

EPANEL # 3, 2016

English

Page 1

This survey will focus on **Social Determinants of Health (SDOH)**. SDOH refer to conditions in which people are born, grow, live, work, and age that ultimately have an impact on their health.

These include:

- Income
- Education
- Employment and working conditions
- Early childhood development
- Race
- Gender
- Sexuality
- Food insecurity
- Housing
- Aboriginal status
- Disability

(Q01)

Do you provide direct patient care?

Yes

No

(Q02)

What role do you see for yourself in taking care of your patients?

Please check all that apply

Treat the symptoms that patients present

Advise patients on lifestyle modifications to improve health

Direct patients to available resources in the community

Work with the community to create resources to help improve health outcomes

Advocate for policy change that would ultimately lead to better health

Other, please specify:

Type here

(Q03)

Please rate your awareness of resources in your community to assist disadvantaged populations? (support programs, shelters, food banks)

- Not aware
- Somewhat aware
- Very well aware

(Q04)

How do you assess potential impact of social determinants of health on your patient's well-being?

Please check all that apply

- Do not assess this as part of my practice.
- Observing patients in practice
- Observing patients in home environment
- Specific questions about individual determinants during appointments
- Using electronic tools or flowcharts during appointments
- Analyzing your patient population's demographics to identify potentially important social determinants
- Other, please specify

Type here

(Q05)

Do you see a role for the CFPC in advocating for government policies that address the impacts of social determinants of health?

- Should not be involved
- Should be a minor area of advocacy
- Should be a significant area of advocacy
- Should be a primary area of advocacy

(Q06)

The CFPC is always looking to support its members in doing their work. What resources would be most useful to you in addressing social determinants of health

in your practice?

Please check all that apply

- No resources are necessary
- Literature on impact that physician work in this area yields
- Tools to enable delivering these services in practice (guidelines, decision trees)
- Opportunity to network with colleagues doing this work
- Information on national support services available for patients (e.g. Old Age Security)
- Information on local support services available (shelters / support groups)
- Other, please specify

(Q07)

Do you have any further comments on addressing social determinants of health in family practice? Your input is appreciated and contributes to the CFPC planning process.
