 Developmental Disabilities	Health Check – A Comprehensive Health Assessment of Adults with Intellectual and Developmental Disabilities (IDD)	The Health Check is a tool to organize a comprehensive health assessment, including physical exam, for adults with IDD. The tool provides an IDD perspective on a task that is familiar to family doctors and primary care nurse practitioners. It identifies health problems common in adults with IDD that are different from the general population, and provides tips and resources to facilitate diagnosis and management. It also includes a practice guide for implementing the tool into clinical practice to enhance feasibility (EMR template).	Surrey Place <a href="#">web page</a>	3,203 views, 109 users found their way to the website via a CFPC referral link.	Not certified
	Developmental Disabilities webinar series	A five-part webinar series where each episode is case based, chosen and presented by a family physician, and, in some cases, supported by other specialists.	<a href="#">Introduction to the Series: Common clinical issues in family practice care of adults with intellectual and developmental disabilities</a>  <a href="#">Epilepsy in adults with intellectual and developmental disabilities</a>	26 attendees  23 attendees	Not certified  Certified: 5
	FM Rounds #12: IDD Health Check	Part of the FM Rounds Podcast Series.  Dr. Ian Casson provides his expert insight into IDD Health Check, a primary care tool for comprehensive health assessments of adults with intellectual and developmental disabilities.	<a href="#">CFPCLearn</a>  <a href="#">Spotify</a> <a href="#">Apple Music</a>	1,163 downloads	Certified: 8

 Global Health	Implementing social interventions in primary care in Canada: A qualitative exploration of lessons learned from leaders in the field.	This study aimed to investigate the implementation process and outcomes of social intervention programs led by primary health care providers, focusing on identifying barriers, key success factors, and lessons learned, with the aim of informing future initiatives and improving health equity within communities.	<a href="#">PLOS One</a>	NA	Not certified
 Gastrointestinal and Digestive Health	FM Rounds #13: Watery Diarrhea	Part of the FM Rounds Podcast Series.  Dr. Val Ginzburg discusses the topic of watery diarrhea as a common gastrointestinal and digestive health issue in family medicine practice.	<a href="#">CFPCLearn</a>  Spotify Apple Music	1,891 downloads	Certified: 20.5
 Health and Environment	FM Rounds #14: Taking an Environmental Exposure History	Part of the FM Rounds Podcast Series.  Environmental exposures have a significant impact on health and well-being, and family physicians play a crucial role identifying and managing these exposures. Taking an environmental exposure history can help uncover potential causes for a patient's symptoms or health conditions.	<a href="#">CFPCLearn</a>  Spotify Apple Music	1,709 downloads	Certified: 21
 Maternity and Newborn Care	Full Circle: A collection of family medicine birth stories	A collection of stories and poems of birth stories to raise the visibility of the valuable work that family physicians provide in caring for patients through their birth journeys.	<a href="#">Book</a>	NA	Not certified
